vaica

Vaica's Complete Solution

Sweeten the pill

Vaica provides solutions that address both service provider & patient's needs. They combine a family of best-of-breed smart medication dispensers with an easy-to-use GSM based cloud software. Together, these create a complete end-to-end solution.

Designing products for health care service providers, while keeping the patient at heart

How does Vaica's solution solve non-adherence

Solving the massive non-adherence problem is not a simple task;
it requires a complete support system:
Easy accessibility for both service provider and patient | Enhanced caregiver involvement |
Compliance encouragement with feedback loops | Creating a full medical image of each
patient | Gathering all information into one application

"The real drug problem – Forgetting to take them
Medication adherence is generally low—approximately 50% to 65%.
This results in $213B of Avoidable U.S. Healthcare Costs"
