

Vaica's Complete Solution

The New Standard for Personalized RPM

Vaica provides a comprehensive solution for remote monitoring of patients' vitals and medication adherence. The system includes a patient management & data collection platform coupled with vital sign monitors and smart medication adherence IoT devices. By providing real-time cross-correlated data, caregivers can adjust and regulate the treatment remotely, increase patient engagement, persistence, and better their outcomes.

Show you care.
Designing solutions
with providers in mind
and patients in heart

Vital Sign Monitoring

Data Analytics Platform

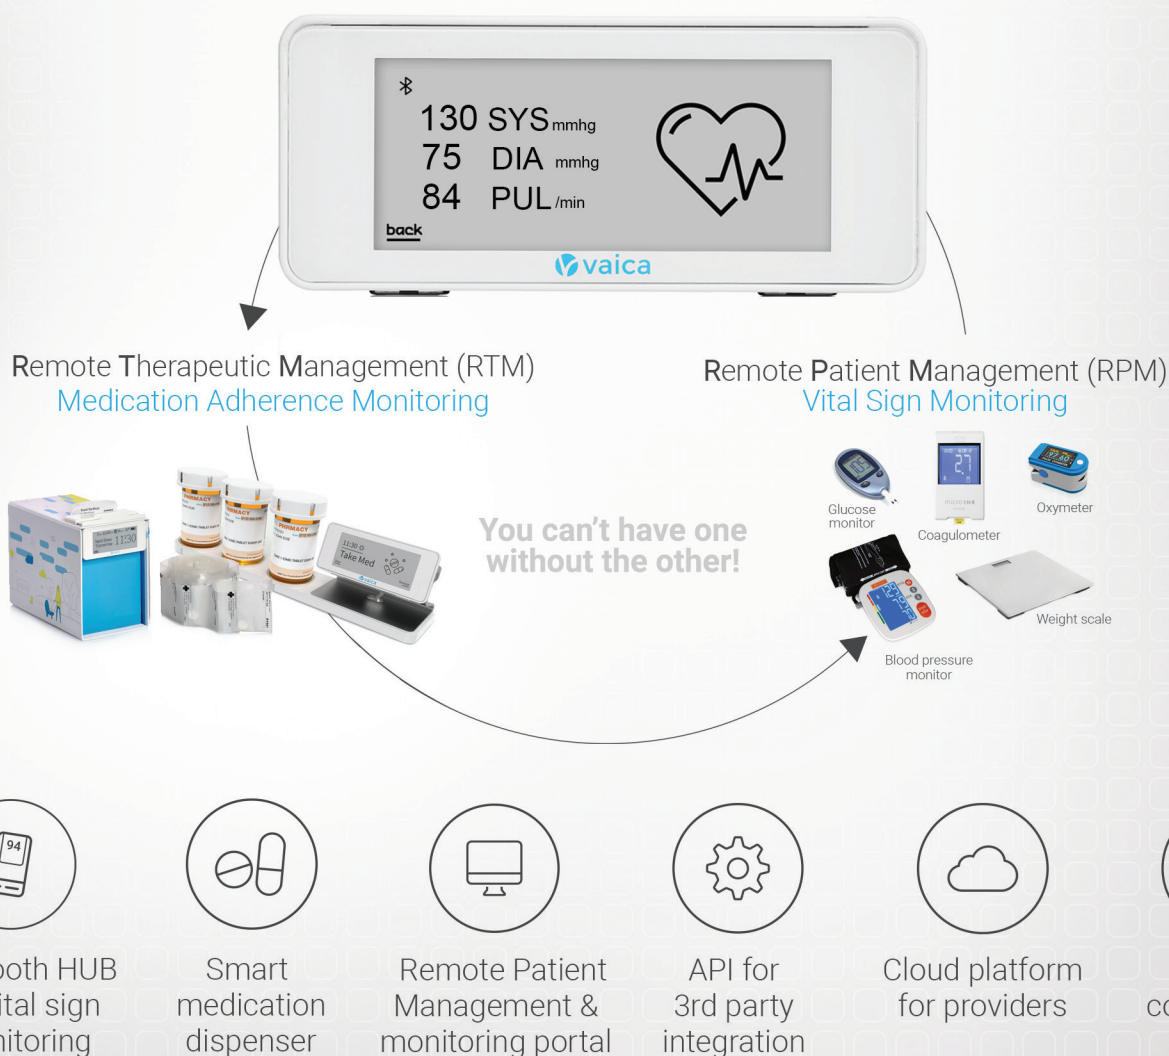

Medication Monitoring

Making informed decisions based on Real-World Evidence (RWE)

- Real-time adherence monitoring enabling fast detection of non-persistence and behavioral habits identification
- Continuous accumulation of Real World Data (RWD) to gain insights on patient's health status and/or response to treatment
- Relevant interventions based on preset thresholds, tailor-made for every patient
- API for quick integration with any 3rd party system (EMR / EHR)

Vaica's Solution Advantages

- **Data collection** seamless collection of vital signs and adherence monitoring
- **Complete product family** supporting all medication modalities
- **Customization** designing solutions to fit different patient populations
- **Plug 'n' Play** simple patient set up. No need for pairing, internet access or a computer
- **Cellular connectivity** automatic cloud connection based on an internal cellular modem
- **Simple integration** with other software systems via our Open API
- **HIPPA & GDPR compliant**, ISO 27001, ISO 27799, FDA exempt, CE Mark
